

KNIFESTYLES OF THE RICH & FAMOUS

2010

FOREHEAD

"Her brows are lifted and more arched, which was likely achieved with Botox injections under the tail of the brow and between the brows," says Dr. Anna D. Guanche. Cost? About \$2K per year.

NOSE

"Ellie's nasal tip is now more refined and her dorsum [between the nose's root and tip] is much straighter, indicating surgery [\$8.5K to \$12.5K]," notes Miami rhinoplasty expert Dr. Jeremy B. White.

CHEEKS

"Her cheeks appear higher and more angular, either due to fillers or clever makeup," shares Dr. Guanche of Calabasas, Calif. "It also looks as if her smile lines have been filled." Total tab: \$1K every few months.

LIPS

"Her lip-filler injections [\$600 and up] are significantly overdone," says Dr. White. "Her upper lip used to have a natural peak and curve, but she's erased those curves and thrown off her facial balance."

NOW

Ellie's Bombshell Remodel

From growing up in public housing in England to cozying up to her country's most eligible royal, Prince Harry, Brit singer Ellie Goulding's life has done a high-tempo about-face. So has her, well, face. While the 29-year-old's A-list makeover has included trading floaty hippie dresses for sexy designer garb and giving her once-pink-tinged mane a platinum polish, it's her streamlining and refining facial nip-tucks that have caught the attention of

Life & Style's experts. "The first thing that strikes me is her lips," says Dr. Anna D. Guanche, a Calabasas, Calif., dermatologist who does not treat the "Love Me Like You Do" chart-topper. "It appears a filler, probably Juvéderm, has tak-

en an already beautiful girl and given her the bombshell effect." Also adding va-va-voom are Ellie's eyebrows, which Dr. Guanche notes have "gone from flat to pretty and arched, likely with Botox." While she says Ellie's new look "could have

been achieved without surgery," Miami rhinoplasty expert Dr. Jeremy B. White (also not Ellie's doc) sees telltale signs of a nose job that, he says, "fits her face well." Let's just say this rags-to-riches tale is getting better all the time. *LS*

The Man's View

BEFORE OR AFTER APPARENT LIP PROJECT?

Mindy Kaling

Not least among the *Mindy Project* creator's many likable traits is her down-to-earth honesty about weight and body image. So it was double-take time when the 37-year-old comedian recently turned up with a noticeable case of trout pout — apparently the result of an enthusiastic round of lip fillers. Did the faux fullness have guys longing for the funnily lady's petite but sweet smacker from 2006 (left)? Not exactly. They claim Mindy's new lips look seriously hotter!

MIRACLE IN A JAR

BANISH CREPE-PAPER SKIN!

It's not just your face that needs age-proofing. Crepey skin — that dry, tissue-thin scourge that starts as early as the 20s — is no longer inevitable, thanks to this proven youthifier from the team of Dr. Payman J. Danielpour and Dr. John Layke at Beverly Hills MD. Theirs is the only product that combines HydraFirm (an instant plumper) with Niacinamide and Riboxyl (which build protein) for results that will kick crepe-paper skin to the curb for good.

Beverly Hills MD Crepe Correcting Body Complex, \$50, beverlyhillsmd.com
